## History

The company "CHMIELEWSKI" started its activity as a craftsman in 1975. Initially employed several people and it was mainly single family homes. At the beginning of the 90 starts with the dynamic development of the plant. Changing the legal status of a company which, since 1989, goes into a civil partnership. He is also attributed to the force to this day the name "General Construction Company and the Installation" CHMIELEWSKI ". The owners and partners are also Bogusław and Bronisław Chmielewscy. Two years later, is built and started producing concrete and concrete reinforced concrete elements for their own and external. In 1994, the base is purchased from the former STW for use as headquarters and base of hardware and transport. He is also an open vehicle inspection station. In 1999 he began manufacturing windows and doors from PVC to the company profile Kommerling. Since 2001, the company has again changed the legal status of civil partnership in the partnership

## Quality Policy

The basis of CHMIELEWSKI Company is to provide products and services at a constant and good quality level in terms of:

- of construction - assembly and installation,
- production of construction materials (PVC joinery, polystyrene, blocks, circles, concrete, mixed concrete, etc.)
- automotive diagnostics.

We produce products and provide services whose quality ensures customer satisfaction and trouble-free operation of the product throughout the established life.

Our motto is:

**TIME FOR QUALITY, RELIABILITY, PUNCTUALITY and PRECISION**

We have set ourselves the following strategic objectives:

1. Continually improving the quality of services and products offered.
2. Increasing customer satisfaction.
3. Improvement of manufacturing technology products and services.
4. Implementation of technical and organizational progress throughout the company.
5. Raising the qualifications and skills of employees at all workplaces.

Implementation, maintenance and continuous improvement of Quality System based on the PN-EN ISO 9001: 2001 in all organizational units of the company.

## **Achievements and successes**

In 1997-1999, Company "CHMIELEWSKI" "was on the" List of the one hundred largest construction companies "in Poland. In 1998 it took 94 place in the second edition of "List of 100" in 1998, 87 in the third edition, while in 1999 the fourth edition of the 95 place. Current company policy is to "return" to the "List of 100" in later editions. On 11/22/1999, the company has acceded to the pilot of the "management practice". Up to 25 companies entered the competition in the construction and wood from five Polish regions: Bydgoszcz, Katowice, Kielce, Krakow and Opole. The task of competing companies was the best implementation of safety management system in accordance with the Polish standard PN-N-18001. The pilot competition was part of the Phare program, which on the eve of Polish integration with the European Union, aimed to help Polish businesses to adapt to the work safety standards, adopted in the EU Member States. The competition has been awarded for achievements in implementing the safety management system, the National Labour Inspectorate. The company has contacts with western neighbors, obtained the right to use the title "Authorised processor in the system window profiles KÖMMERLING". This title is a guarantee of the highest quality produced by the enterprise, windows and doors.

Our company operates a very large construction activity.

### **General Construction**

- schools
- hospitals,
- gyms,
- people's homes,
- residential and service buildings.

### **Industrial Construction**

- water treatment plant,
- Storage of potatoes,
- expansion of the brewery,
- construction of production halls and warehouses in the Coca-Cola factories.

## **Civil engineering**

- sewage treatment plants,
- sewage and stormwater drainage and water
- levees,
- landfills.

## **Demolition and demolition**

- Steel structures, concrete and mixed.

## **Production**

The Company CHMIELEWSKI has its own concrete plant in which manufactured goods and articles of concrete and reinforced concrete. The company operates a sand pit in Włodzienin village, which is also her own. At the headquarters of the Kołłątaja 7 street is factory windows and doors from PVC and Aluminium profiles brands.

## **Concrete plant Głubczyce**

Plant Precast Elements Concrete and reinforced concrete with a concrete mixing plant covers an area - 0.80 ha.

## **Concrete plant activities**

Production of concrete and concrete products and concrete:

Ready-mix concrete Class B 7.5 - B 35 (including hydro) on the node cement capacity of 40 m<sup>3</sup> / h.

We provide transport services for concrete mixers and pump service.

Manufacture of precast concrete and concrete with the following range:

- Road materials:
  - Concrete Edging (75x30x8)
  - Concrete curb (100x30x15)
  - Reinforced concrete road plate (300x150x18)
- Precast reinforced concrete lintels L-19
  - N/120
  - N/150
  - N/180
  - N/210
  - N/240
  - N/270
- Prefabricated reinforced concrete wall enclosure excavations Ø 2250 mm
- Reinforced concrete foundation blocks M-6
- System wells sealed concrete Ø 1200
- Circles with steps:
  - CG-K 1200/250 mm
  - CG-K 1200/500 mm
  - CG-K 1200/750 mm
  - CG-K 1200/1000 mm
  - CG-S base wells 1200/850 mm (without kinetics)
  - CG-Q the cover plate Ø 1500/600 mm h = 20 cm
- Additional elements:
  - PVC sealed passage 160, 200, 250, 300 mm
  - intervertebral seal Ø 1200 mm
  - ring is at the hatch:
    - h = 6 cm
    - h = 8 cm
    - h = 10 cm
    - h = 18 cm
- prefabricated elements of reinforced concrete

Our facilities have good equipment:

- mixing plant of the Czech production of cement silo 60 t,
- crane with a lifting capacity of 5 tons,
- complete reinforcement of machines, sealer points.

## Concrete plant Brzeg

Assortment of Concrete plant:

- ready-mix concrete Class B 7.5 - B 35 (also info about services transporting concrete)
- Concrete edges (75x30x8)
- Concrete curbs (100x30x15)
- plate reinforced concrete road
- precast reinforced concrete lintels L-19
  - N/120
  - N/150
  - N/180
  - N/210
  - N/240
  - N/270
- reinforced concrete foundation blocks M-6
- CG-Q the cover plate Ø 1500/600 mm h = 20 cm

## Sand pits

Department of Natural Aggregates - the company holds a concession for exploitation. Sand pit area - 21 840 m<sup>2</sup> (mining area). Resource deposits - 154.6 thousand tons. Sand pit located in the town Włodzienin 13 km from Głubczyce.

## Joinery PCV

The company manufactures windows, doors, walls and facades of the PVC version of the typical and atypical on request.

### Eurodur 3S-3K

The window and door profiles:

- fittings mounted internally displaced axis of the closure to 13 mm lead to significant improvement in security against burglary,
- five percent slope of the upper plane of the profile for optimal drainage,
- double groove in the outer, lower part of the frame for optimum water drainage,
- revoked glazing bead to improve optics and to facilitate cleaning, construction rebate varied considerably improves the quality of attachment of the hinge leaf,
- hardware hooks mounted directly to steel - better protection against burglary by stable positioning of screws, screwed directly into the steel hinges of the wings.

### EuroFutur

The window and door profiles:

- due to the increased profile depth of 70 mm we obtained significant improvement in isolation, without compromising the structural stability and maximum area of glazing,
- additional fifth chamber, improving insulation, thanks to the steel reinforcement of novel shape,
- maximum plastic resistance to weather and impact resistance - fully suitable for re-use, modern refined calcium zinc stabilizers,
- fittings mounted internally displaced axis of the closure to 13 mm lead to significant improvement in security against burglary,
- highly visible rounded exterior and interior surfaces make the windows in the system EuroFutur have very modern look,
- quick and efficient removal of water - as required by the outside or invisibly down

- allowing for smooth and easy to clean internal oblique part of the profile does not hold dirt.

## Fittings

Winkhaus fittings for many years to successfully maintain a high position in the market by providing modern joinery fittings and provide comprehensive services for manufacturers of windows and doors.

Enveloped hardware WINKHAUS: autopilot and FLEX make it easy to close the window, open and repeal:

- fitting envelope, depending on the size of a sufficient number of bolts wings,
- fitting adjustable settings and adjust the clamp to the frame wing, anti-theft hooks as standard (no extra charge).

## Glass

Many years of excellent business with the world's largest corporation's allows the company to offer its customers a wide range of glazing units. Glass used in our windows and doors are manufactured using the latest technology which allows for the highest quality products.

**CHMIELEWSKI Company** provides services in the field of road transport, hire of cranes and construction equipment, concrete mixers and concrete pumps. District Vehicle Inspection Station conducts inspections of all types of cars, vans, trucks, vehicles for the transport of hazardous materials, and agricultural tractors, buses, motorcycles, trailers and the first registration of vehicles imported from abroad and brand vehicles, "SAM". The company has a hand car wash that offers the following services: washing and cleaning vehicles, engines, washing car upholstery, furniture and washing carpets.

We have in our fleet of trucks from companies such as:

- SCANIA,
- DAF,
- LIAZ,
- MAN.

Our company provides services in the field of heavy construction equipment rental.

We have professional construction equipment:

- cranes,
- backhoe loaders,
- bulldozers,
- concrete mixers,
- concrete pumps,
- platform,
- battle,
- compressor.

## **Vehicle Inspection Station**

- Vehicle Inspection Station - with the status of the Regional Vehicle Control Station conducts surveys and registrations of all types of car shows, cooperates with the Motor Transport Institute in Warsaw.

Our services include reviewing the following vehicles:

- passenger cars,
- vehicles,
- trucks,
- special vehicles,
- vehicles for the transport of dangerous goods
- tractors,
- buses,
- motorcycles,
- trailers, semitrailers,
- The first registration of vehicles imported from abroad,
- vehicles adapted for gas supply

## Hand car wash

Manual car wash provides professional services in:

- comprehensive washing of cars and vans,
- comprehensive interior cleaning,
- cleaning and maintenance of leather upholstery,
- body waxing,
- cleaning of engines,
- upholstery wash all types of vehicles,
- wash upholstery,
- washing carpets.
